Warn Accessories Provide a Complete ATV Plowing Solution

Clackamas, OR (September 20, 2003) On the heels of its latest ATV plow system introductions, Warn Industries today announced the availability of a new set of ATV plow accessories that are designed to increase efficiency and productivity in virtually plowing condition.

Included in the new ATV plow accessory family are the following:

- Plow lift rope—An 8-ft. length of high-strength synthetic rope that temporarily replaces the Warn ATV winch's wire rope for the purpose of lifting any Warn plow blade
- Wear bar—A super-tough ¾-inch-thick plastic plow blade leading edge that saves wear and tear, even on concrete and brick. It is reversible for extended usage on Warn plows..
- Snow control flap—A flexible rubber extension to the plow blade top that controls snow kickback. It is easily cut to fit any plow blade.
- Blade sidewall—An 11-gauge steel side wing that bolts on easily and turns the Warn plow into a scoop for gathering purposes. Works on snow as well as in plowing of farm and agricultural materials.
- Plow markers—A set of 2-ft. high antennas that bolt on to mark the plow blade edges in deep-snow conditions. Red rubber tips ensure visibility.

About Warn Industries

Warn Industries designs, manufacturers and markets a full line of off-road equipment and accessories that enhance the performance of four-wheel-drive vehicles. It is the world's most recognized brand in off-road products such as hub locks and vehicle recovery winches. Warn employs more than 550 people in and around Portland, Ore. and Livonia, Mich. For over 50 years, whenever durability and dependability have mattered, customers have chosen Warn products.
