## **Warn Industries Accessories for Jeep Wrangler Rubicon JL Factory Winch Bumper**

**Las Vegas, NV (10/30/18)** – Warn Industries has released several durable, useful accessories designed to add increased protection and style to the 2018+ Jeep Wrangler Rubicon JL's optional steel factory bumper.

### **Grille Guards**

For JL owners looking to add more front end protection to their vehicles, Warn Industries introduces three different bolt-on grille guard tubes. Available in low, mid, and "stinger" varieties, these grille guards are composed of 2" steel tubing and wear a sophisticated powdercoated finish with a multi-step pretreatment process to resist against corrosion and ensure years of great looks. These tubes offer an easy no-cut, no-drill, and no-grind installation.

### **Hook Stay**

This black or red powdercoated hook stay allows users to attach the winch's hook in a secure, out-of-the-way spot. It also covers the opening around the bumper's fairlead for a clean, finished look.

### **Multi-Purpose Recovery Point**

The optional factory bumper does not have a place to mount a recovery shackle or a place to use an off-road jack. This multi-purpose recovery point solves both of those problems. Made from durable steel, this accessory gives a proper recovery point and a load-bearing place to place an off-road jack.

### **About Warn Industries**

Warn Industries is the world's most recognized brand in off-road products such as hub locks and vehicle recovery winches. The company designs, manufactures and markets a full line of off-road equipment and accessories that enhance the performance of four-wheel-drive and powersport vehicles. Warn Industries is headquartered near Portland, OR.
