## **Warn Industries Releases New Line of Fender Flares for Late Model Pickups**

**Clackamas, OR (9/5/18)** – Warn Industries is excited to debut a new lineup of premium fender flares for late-model pickup trucks. Introducing WARN 4X Fender Flares.

Precision molded from durable multi-layer ABS Senosan® plastic and wearing two coats of OEM-grade satin black paint for excellent UV protection (yet are fully paintable for a custom look), these innovative flares have a perfect fit and compliment the vehicle's original styling and lines. The flares' aerodynamics stop rocks and road debris from chipping the paint. Plus, there's extra protection thanks to the integrated "anti-splash" mud flap.

WARN® 4X Fender Flares feature patented Super Bolt® technology. The flares adhere directly to any smooth surface and provide a mechanical fixation to the body eliminating vibration and paint damage. Plus, there's no drilling required\*. Additionally, the rubber edge trim is pre-installed from the factory, eliminating the often frustrating and time-consuming task many aftermarket fender flares require. This means less time spent working on the truck and more time behind the wheel.

Current applications include:

2018+ Ford F150

2015-2017 Ford F150

2017+ Ford F250 and F350

2014–2018 Chevrolet Silverado 1500 (standard, short, and long bed applications)

2016 Chevrolet Colorado (short and long bed applications)

2016+ GMC Sierra (standard, short, and long bed applications)

2013–2018 Ram 1500

2014–2018 Toyota Tundra

2016+ Toyota Tacoma

With an aerodynamic shape, easy installation, and a precise fit, WARN 4X Fender Flares will add style and paint protection to late-model pickups.

*\*Drill-free on all applications except P/N 102020*

### **About Warn Industries**

Warn Industries is the world's most recognized brand in off-road products such as hub locks and vehicle recovery winches. The company designs, manufactures and markets a full line of off-road equipment and accessories that enhance the performance of four-wheel-drive and powersport vehicles.
